

2013 TECHNOLOGY GUIDE

myShortTrack

myShortTrack is a cloud-based transaction management application for real estate professionals. Going beyond a paperless approach, myShortTrack manages all your real estate transactions with dynamic workflows while connecting all participants seamlessly on any device.

1. Invite anyone to the transaction
2. Share only what you want with any invited participant
3. Track all of your emails, documents, tasks, notes, and file activity in one place
4. Turn checklists into workflows with document sets to give every client a consistent, professional experience.
5. Keep everyone informed with real-time notifications emailed to transaction participants

For the brokerage, myShortTrack is a configurable platform that will fit any company. Brokers can integrate the powerful transaction management of myShortTrack with their existing software (CRM, marketing, accounting, etc.). Managers get buy- and sell-side reporting, all while giving their agents the ability to control everything from any computer or mobile device.

Keep your eyes peeled for announcements re: DocuSign, Contactually, and your local MLS this June
